

What's happening in Lewisham

Estates

Lewisham has four neighbourhood care networks to strengthen connections across health and care professionals and with the voluntary and community sector to deliver community based care which is proactive, accessible and coordinated.

We are looking at establishing **neighbourhood hubs** to support our neighbourhood care networks and the delivery of community based care. Whether you need support from a GP, community nurse, social care, mental health or the voluntary sector they will be working better together so that you experience joined up and seamless care.

Potential sites have been identified, including the Waldron Centre, Downham Health Centre and using part of the University Hospital Lewisham (UHL) site – in addition to UHL's hospital services.
